Urban Water Management Plan 2025 Update

Atascadero Mutual Water Company (AMWC) is currently updating its Urban Water Management Plan (UWMP) as required by the California Department of Water Resources. The Water Shortage Contingency Plan that was adopted in July 2021 will be included as an Appendix to the update.

The public draft of the UWMP update is currently available for review by appointment at AMWC's Administration office at 5005 El Camino Real, Atascadero and on its website www.amwc.us/publications or at the following link: [Urban Water Management Plan 2025 Update \(draft\)](#).

The AMWC Board will consider adopting the UWMP update at its October 2026 meeting.

The UWMP update is prepared by urban water suppliers to support their long-term resource planning and ensure adequate water supplies are available to meet existing and future water demands over a 20-year planning horizon. The plan includes an analysis of projected population growth, current and future water demands, as well as water supply and pumping data.

AMWC encourages local agencies, the public, and other interested parties to participate in the development of the UWMP update by providing written comments prior to the September 2026 board meeting. Written comments can be emailed to jneil@amwc.us or mailed to Atascadero Mutual Water Company, P.O. Box 6075, Atascadero, CA 93423 no later than Monday, August 31, 2026.

For more information, please contact AMWC at (805) 466-2428 or visit www.amwc.us.
